

# JOE CAPLE

## CGI ARTIST & DIGITAL CONTENT CREATIVE

High Wycombe, Buckinghamshire | [Portfolio](#) | [LinkedIn](#)

### PROFILE

Commercial CGI artist and digital creative with more than four years of professional experience across broadcast animation, product visualisation, digital marketing and interactive web development. Skilled across full creative pipelines, from modelling, texturing, lighting and rendering through to compositing, branded content, landing pages and frontend implementation. Combines strong visual craft with practical experience in creative leadership, stakeholder collaboration, workflow optimisation and AI-supported production systems.

### CORE SKILLS

**3D & Rendering:** Cinema 4D, Maya, Blender, ZBrush, Substance Painter, Arnold, Redshift and V-Ray

**Production:** Lighting, rendering, compositing, materials, scene optimisation and post-production

**Digital & Web:** HTML, CSS, JavaScript, HubSpot CMS, HubL, UI/UX workflows and GitHub Pages

**Marketing & Leadership:** Branding, SEO, landing pages, social campaigns, stakeholder collaboration and onboarding

### PROFESSIONAL EXPERIENCE

#### Digital Marketing & AI Consultant | Caple Consulting June 2025 - Present

- Lead creative delivery across digital campaigns, branded content, landing pages and promotional assets for business clients.
- Design and implement AI-supported marketing workflows that combine automation with human-led creative direction, review and strategic oversight.
- Create CGI visuals, motion graphics, social content, brand assets and launch materials from concept through final delivery.
- Build responsive landing pages and interactive frontend experiences using HTML, CSS, JavaScript, HubSpot CMS and HubL.
- Plan and manage content across LinkedIn, web and social channels, supporting SEO strategy, analytics and iterative optimisation.
- Coordinate contributors, distribute production tasks and review campaign outputs for quality, consistency and alignment with brand identity.
- Advise businesses on digital growth, creative workflow improvement, AI integration and scalable content production.

#### CGI Designer | Gtech 2024 - 2025

- Produced photoreal CGI product renders and visual assets for digital campaigns, ecommerce, social media and internal presentations.
- Delivered work across the full 3D pipeline, including modelling, UV preparation, texturing, materials, lighting, rendering, compositing and final output.
- Developed physically accurate lighting setups and product shaders to create premium commercial visuals aligned with brand standards.
- Collaborated with marketing and creative teams to translate campaign briefs into assets for multiple channels, formats and aspect ratios.
- Adapted outputs for web, ecommerce, paid advertising and social deployment, while supporting image refinement, grading and presentation preparation.

## PROFESSIONAL EXPERIENCE - CONTINUED

### CGI Designer | Gtech (continued) 2024 - 2025

- Supported camera operation and production setup for promotional shoots and internal marketing content.
- Took lead responsibility on selected 3D projects and helped improve scene organisation, render efficiency and troubleshooting workflows.

### Lighting & Render Artist | Pop Paper City 2022 - 2024

- Contributed to lighting, rendering and scene optimisation throughout production of a 52-episode broadcast animated television series.
- Worked with directors, animators and production teams to maintain visual consistency, mood and lighting continuity across episodes.
- Set up and refined lighting passes, render outputs and scene configurations to meet compositing and broadcast delivery requirements.
- Troubleshot render issues and optimised scenes and workflows to maintain quality within fast-paced production schedules.
- Supported final visual polish through iterative review, colour balancing, render consistency and collaborative feedback implementation.
- Helped onboard and train new team members, providing guidance on studio workflows, lighting setups, scene optimisation and render troubleshooting.

## SELECTED PROJECT

### DnD Moovables Web Application | Personal Project Ongoing

Designed and built a browser-based tabletop and battle-map application featuring hosted maps, fog-of-war controls, draggable tokens, persistent campaign systems and dedicated DM/player functionality. Developed the frontend using HTML, CSS, JavaScript and JSON state handling, with deployment through GitHub Pages.

## EDUCATION

**BA (Hons) 3D Modelling & Animation** - Bournemouth University (2019 - 2022)

**Level 3 Diploma in Computer Science** - Bournemouth and Poole College (2018 - 2019)

## TECHNICAL TOOLKIT

Cinema 4D | Maya | Blender | ZBrush | Substance Painter | Arnold | Redshift | V-Ray | Photoshop | After Effects | HTML | CSS | JavaScript | HubSpot CMS | HubL | GitHub
